Lufran Solutions

Accessibility

Last updated: 11 November 2026

Address of this version: lufransolutions.com/en/accessibility/2026-11-11/

We want everyone to be able to use this website, with or without assistive technology. Our goal is to meet the Web Content Accessibility Guidelines (WCAG) 2.2 at level AA. Andorra's Llei 24/2025, d'accessibilitat universal requires digital information to be accessible (Article 26).

What we've done

- Everything works with a keyboard, with a clearly visible focus indicator.
- Headings, landmarks and text alternatives for screen readers.
- Text contrast of at least 4.5:1, in light and dark mode, and 7:1 with Increase Contrast.
- A layout that adapts to any screen and to 400% zoom without losing content.
- Animations turn off when your system has "Reduce Motion" enabled.
- Pages in Spanish, English, Catalan, French and Portuguese.

How we check

Before it goes live, every release of this site passes automated tests: axe-core against WCAG 2.2 AA on every page in every language, in light and dark mode; the keyboard and focus on the home page; and no sideways scrolling with text at 200% or with 400% zoom. The site you see today passed them all on 24 November 2026.

It hasn't yet been tested with a screen reader or with people with disabilities. So we don't claim that the site fully meets WCAG 2.2 AA.

Known limitations

We don't know of any. If you find one, please tell us.

Found a barrier?

Write to support@lufransolutions.com telling us which page and what happened. We'll look into it and get back to you within a week at the latest.
